

Importing project in IntelliJ IDEA Ultimate

1. Close your active project.
2. From the menu select „Open”
3. Find „ItConference” folder and open it.
4. Click „Import” on the notification that appears.
5. Run application.

Using Maven

1. Open command line
2. Navigate to the root of the project (folder ItConference)
3. Execute command `mvn spring-boot:run`
